

## ADVANCED APPLICATIONS OF DERMAL FILLERS

An intense **one-day** course that provides an introduction to advanced applications and techniques with dermal fillers, focusing on facial sculpting, layering products, and expanding your dermal filler portfolio.

- Pre-requisite: Must have taken Level 1 or an equivalent course.

# DERMAL FILLERS LEVEL TWO

## HIGHLIGHTS

- Patient assessment and consultation
- In-depth review of facial anatomy and injection techniques to ensure treatments are safe and effective
- Expanded dermal filler portfolio and rationale for product choice
- Advanced injection techniques such as cross-hatching, scaffolding, 3D-vectoring and pre-periosteal injections
- Layering products and combination therapy with neuromodulators for optimal results
- Principles of staged facial sculpting
- Risks, complications, and contraindications of dermal fillers and how to manage them
- Appropriate fee structure and how to incorporate dermal fillers into dental treatment plans
- Customizable documentation templates
- Diagnose and treat model patients with one-on-one instruction
